**IMPACT**

A world with improved land governance that supports people with insecure land rights, protects those vulnerable to landlessness, and ensures open access to information for all.

**ULTIMATE OUTCOME**

An open, inclusive, and democratic land information ecosystem that helps decision making, policy, and practice at all levels.

**INTERMEDIATE OUTCOME**

- Land governance issues are well documented and monitored.
- An open and democratic standards-based data infrastructure enables the flow of land information across perspectives and levels.
- The land debate is rich, informed, and inclusive.

**IMMEDIATE OUTCOME**

- Policy makers, practitioners, and researchers access knowledge and information on land governance through a multilingual, intuitive, and up-to-date platform. They apply increased knowledge and understanding of complex land issues, encompassing different languages, geographies, and themes.
- Information providers take steps towards sharing data through a standards-based data infrastructure that improves discoverability, accessibility, and interoperability.
- Information users encounter fewer/lower barriers to data access.
- Information providers and governments consider measures to make data ecosystems more democratic.
- Diverse stakeholder groups connect, collaborate, and provide balanced perspectives on land issues.
- Both producers/providers and users of land data promote it as a public good.

**INFORM**

**OUTPUTS/INITIATIVES**

- Country and Thematic Insights
- Data Explorer
- Land Governance Monitoring
- Land Portal Digital Platform

**INPUTS/ACTIVITIES**

- Develop, publish, and update knowledge products such as Country Portfolios and data stories
- Develop dashboards or pages to document international or regional monitoring frameworks, including SDGs and VGGTs
- Improve platform user experience
- Improve data visualizations

**OPEN**

- State of Land Information (SOLI)
- LandVoc
- Open Up Guide
- Data Literacy and Advocacy
- Land Portal Data Collection & Enrichment

**INPUTS/ACTIVITIES**

- Document (meta) information about country-level land data and develop comparative data assessments (SOLI)
- Implement Open Up Guide at country level
- Develop information sharing partnerships and enrich data imported to the Land Portal with metadata
- Further develop LandVoc
- Increase knowledge of Open Data Principles and good data management practices at country and global level

**DEBATE**

- Voices from the Land: Facilitating Diversity, Equity, and Inclusion
- Land Portal Knowledge Exchange
- Organizational Communications

**INPUTS/ACTIVITIES**

- Increase engagement with stakeholder communities in the Global South
- Increase content in French, Spanish, and Portuguese to welcome more diverse voices
- Encourage debate and sharing of knowledge across LP stakeholders
- Provide thought leadership on the open data conversation in the land sector

**SITUATION**

- Fragmented, incomplete, and closed data and knowledge.
- Poorly managed data from local sources leaves key information inaccessible and under-leveraged.
- Discussions around land governance exclude grassroots voices.
